## **Chapter 1 Product presentation**

#### 1.1 Appearance

#### 1.2 Main Features

- Compatible with Chinese | Southeast Asia standard wall boxes, simple in wall installation.
- 4-inch HD LCD, IPS, multi touch screen, Auto light sensor.
- ZigBee gateway function, APP remote control.
- Control the lights, curtains, air conditioners, and all other Smart Home devices. Configure Smart Home scenes in the APP, turn on the scene mode with one touch on the screen.

## **Chapter 2 Product Specifications**

Specification			
CPU	PX30 Quad core	OS	Android 8.1
	Cortex-A35		
RAM	2GB	Screen	4 inch 480*480
			Multi-touch
ROM	8GB	Bluetooth	BLE4.2 Single point
Ethernet	10M/100M Adaptive	RS485	Half-duplex 3.81mm
	Ethernet		terminals
WiFi	802.11b/g/n150Mbps	Zigbee	TYZS13 MODULEPHY/MAC Zigbee
VVIII	2.4GHz	zigbee	network protocol stack
Functions			
Voice	Deep not support voice control		
Control	Does not support voice control.		
Relays	Built in 2 relays which can control 2 switches of the room lights		
	locally.		
Music play	Built in 1W Mono speaker	, Support loc	cal music source play, online
music sources optional.			
Light	Automatically adjust t	he screen	brightness according to
sensor	surroundings.		

One Smart Control Panel could control all your smart switches, smart

plugs, lights, air conditioners, curtains, locks, security cameras, smart

sensors,up to 100+ ZigBee sub devices.

#### 3.1 Interface and ports

#### 3.2 Specifications

ltem	Specifications	
Power	100~240VAC,50/60Hz	
Wireless	Wi-Fi,Bluetooth,Zigbee	
Protocols		
Working	0°℃~40°C	
Temperature	0 0 ~40 0	
Working	5%~90%RH	
Humidity	370 - 90 /0111	
Product	86x86x10mm (without the base)	
dimensions	86x86x36.6mm (with the base)	
Net weight	210g	

#### **Chapter 4 Installation instructions**

• Turn off the main power in the electricity box and confirm the fire wire is not alive with a test pencil.

• Remove the base of the Smart Switch and install it in the wall box (as shown in the pictures following).

• Check the wires and make sure the wires are in good contact with the terminals and no exposed cooper wires.

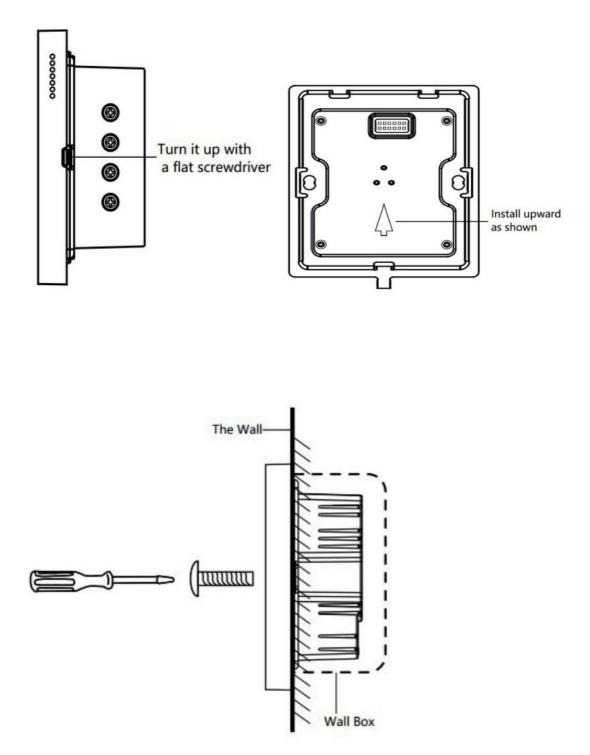

• Fasten the base to the wall box with mounting screws and fix the Smart Switch back to the base.

• Note that the screws should not be fixed too tight during installation in case any deformation or damage to the screen and hardware.

• If the Smart Switch is not flat after installation, do not press the screen

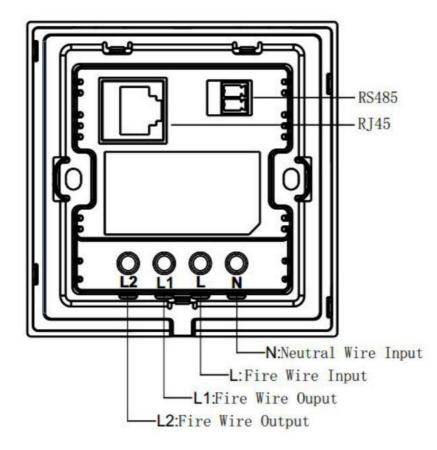

violently, please check the wall box and the base installation at first.

#### 4.1 Installation drawings

#### Depth of the wall box should be more than 50mm.

#### 4.2 Wires connection drawing

## **Chapter 5 Operation guideline**

#### 5.1 Safety Notes\*\*\*\*\*

•The product must be installed by professional electricians.

• Turn off the main power in the electricity box and confirmthe fire

wireisnot alive with a test pencil.

- The product should be kept away from fire and water during installation and use.
- The product can not be used in moisture circumstances such as bathroom.
- Please note the product does not support POE power supply. Do not connect PoE switch to this product which would cause damageto the product.

# 5.2 Operation guideline(Only YC-SM06EZ with Zigbee module can use Tuya function as below)

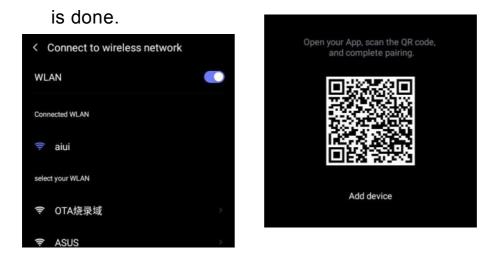

\*This operation guideline is based on Tuya ZigBee, Tuya App,Tuya cloud platform and YC-SM06EZ firmware. If any other platforms or firmware, please follow their operation guidelines.

(1) The product will be turned on once you connect it to the power supply. The product will get to the network settings

when you start it in the first time. You can also get into the network settings from the select menu by dropping down from the top of the LCD screen.

(2) There are two options in the network settings. You can select wireless connection or wire connection. There will be a QR code showing on the screen after the network connection

(3) Start the Tuya App in your smart phone, select the " <sup>(3)</sup> at top right corner in the App home page, and then select the " <sup>(3)</sup> at top right corner in the App page.

(5) Get into the product interface in the Tuya App, you will see

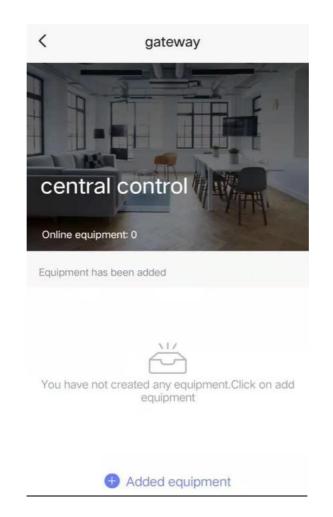

the gateway and switch icons like *and b*. Click the switch icon to control 2 local switches (load of each switch should be no more than 200W.). It means the switch is off when the icon is in grey, and the switch is on when it is in orange.

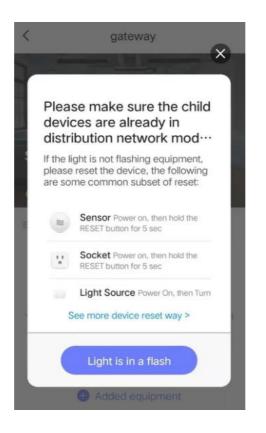

Long press switch 1 or switch 2 to change the name of the switch.

(6) Click the gateway icon to add ZigBee sub devices.

Make sure the ZigBee sub devices are in the set-up mode. The gateway will search and add the sub devices automatically. You can follow the user manual of the sub devices to make sure it is in set-up mode. (Usually it is long press the power button or the reset button in 5s, then the LED indication light will flickering which means it is in the set-up mode.)

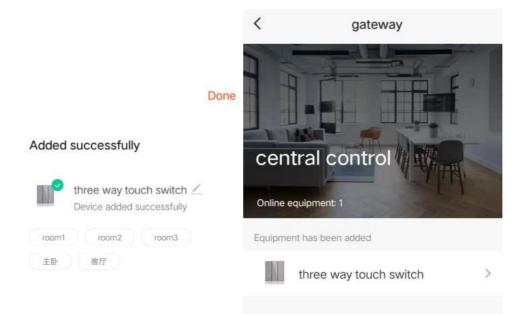

You will see the following pictures in the Tuya App when you are adding sub devices to the gateway. Make sure the sub devices are in the set-up mode and the LED indication light is flickering.

(7) Click the finish button on the App after you add the sub device successfully. For example (2 switches panel) as the following.

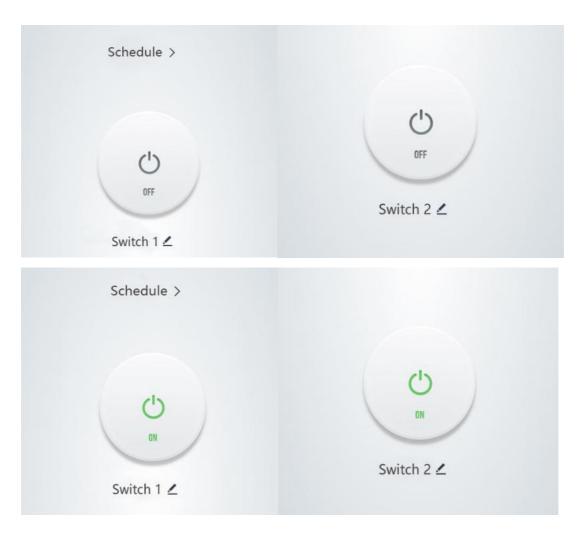

<	Search device
1 devi	ces have been successfully add <b>ed</b>
	three way such switch
	DONE

(8) You could change the name of the sub devices after they are added to the gateway successfully.

(9) You could change the device type by getting into the

device interface in the App. It means the switch is off when it is in grey, and the switch is on when it is in green. You could also set up timers(Schedule) for the switches to realize the automation control.

If there is any questions when you add some other sub devices, please contact us for support.
